Experience

Product Designer | Veteran Benefits Guide
2023 – Present

- As the first product designer, own design across the entire portfolio. Three customer facing platforms (one B2C, two B2B) and the company wide internal CRM, setting UX strategy end to end.
- Led the legacy to new platform migration, turning the manual claims process, the core operational bottleneck into guided self-serve flows (53.1% adoption, 48.6% faster task completion, 22% higher throughput) and redesigning the CRM to double claim submissions. The platforms bring in 1000+ new leads a month and serve several hundred veterans monthly.
- Created the design system used across the three customer facing platforms (B2C and B2B). For the internal CRM (built on Salesforce), redesigned the experience on Salesforce's design system, ahead of a planned move to a self-built CRM.
- Leading research and strategy for a unified, AI-powered product consolidating the portfolio into a single experience, with an AI first process (prompt design, Claude, Figma Make) built into daily work.

Product Designer | Anonymous Agent
May 2022 – October 2023

- Led design and launch of a two sided marketplace (mobile app + responsive web) connecting small local businesses with nano-influencers: 900+ influencers and 132+ businesses onboarded in six months, 20–30% daily user growth.
- Built the comprehensive UI library and design foundation, and initiated user research, interviews and cross functional testing synthesis that guided design decisions; iterative testing lifted engagement 13.1% and task success10.3%s
- Continuously iterated the app and website on user feedback, delivering wireframes, mockups, prototypes, and specs for handoff with developers, PMs, and stakeholders.

UX Design Intern | Young & Hungry Creative
January 2022 – May 2022

- Redesigned donation flows and optimized CTA placement, increasing donor conversion by 12.2%.
- Modernized event campaign micro sites, boosting registrations by 8.5%.
- Improved nonprofit user trust through clearer hierarchy and simplified information architecture.

UX Design Co-op | General Motors
September 2021 – December 2021

- Designed and built the Webflow website end to end, including design, build, and launch, with no engineering support — showcasing four life experiences representing GM in 2039, amplifying the brand, vision, and company values.
- Partnered with UX designers, industrial designers, and brand designers across teams on multi-sensory experience research.

Freelance UX Designer
August 2020 – June 2021

- Partnered with two small business clients to identify UX challenges and develop design strategies that improved customer trust and engagement.
- Conducted user interviews and usability studies; translated insights into UI components and design specifications, and handed off designs to engineers with wireframes and clickable prototypes.

Education

Academy of Art University
January 2020 – May 2022

M.A., Interaction & UX/UIDesign; San Francisco, CA

Zhejiang University of Technology
September 2011 – June 2015

B.F.A., Digital Arts

Skills

AI: AI-first workflow & prompt design, Claude, ChatGPT, Figma Make

Design: Design systems, Interaction design, Information architecture, Prototyping, Accessibility

Research: Usability & A/B testing, Mixed-methods research, Workshops

Tools: Figma, Adobe Suite, Framer, Webflow, GitHub, HTML/CSS/JS
